

**KOI CARE**

**E - X - 5**

Anti-parasite Treatment

Malachite green and Formaldehyde, used together, are the best treatment for common external parasitic infections.

E - X - 5 is a special formulation of these key ingredients which is added to the pond every day for a five day course. It is not only an antiparasite treatment but also effectively clears up secondary fungal infections

Because E - X - 5 is added every day for 5 days, it is safe to use in ponds containing sensitive fish such as Sterlet, Tench, Rudd or Orfe.

E - X - 5 can also be added to the pond as a single dose preventative treatment, for example, in early spring or when new fish are introduced to the pond.

Before treating with E - X - 5:

- Remove adsorbent filter material - carbon, zeolite etc.
- Switch off UV
- Increase Aeration
- Allow plenty of time to observe fish
- Do not mix medications
- Leave 10 days between treatments if no improvement is seen

**Dosage:**

Add 10 ml of E - X - 5 to every 400 gallons (1820 L) of pond water every day for 5 days.

| Pack size | Treats     |              |            |
|-----------|------------|--------------|------------|
|           | Litres     | Imp. Gallons | US Gallons |
| 250 ml    | 5 x 9 000  | 5 x 2 000    | 5 x 2 380  |
| 500 ml    | 5 x 18 000 | 5 x 4 000    | 5 x 4 764  |
| 1000 ml   | 5 x 36 000 | 5 x 8 000    | 5 x 9 528  |
| 2500 ml   | 5 x 90 000 | 5 x 20 000   | 5 x 23 800 |
